## CLIENT UPDATE

### Franchise Capital Reports Agreement on Closing Terms for Aero Exhaust Acquisition

Steven R. Peacock, managing director of Javelin Advisory Group and current Chief Executive Officer of Javelin client Franchise Capital Corporation, has taken two recent trips to South Jordan, Utah where he held meetings with management of Aero Exhaust to discuss terms and procedures of the close of Franchise Capital's acquisition of Aero.

Mr. Peacock reported in a press release issued by Franchise Capital that the two companies have reviewed the details necessary to close the transaction in accordance with the terms of the Definitive Agreement and within the expected closing timeframe. Franchise Capital and Aero reached a Definitive Agreement in January 2007 and the close of the acquisition has been scheduled for the week of September 30, 2007.

Aero Exhaust mufflers are an exclusive NASCAR Performance product and carry the prestigious NASCAR brand on product, packaging and related media. More information on Aero and its innovative, patented performance exhaust airflow technology can be found on its website at [www.aeroexhaust.com](http://www.aeroexhaust.com).

After returning from his trip to the Aero corporate offices, Mr. Peacock reported that he met the senior management of Aero Exhaust, including the company's Board of Directors, as well as a major shareholder of Aero Exhaust.

"This was our first opportunity to formally meet with virtually all of Aero's upper management, including the entire Aero Board, and I was impressed with the leadership and vision that they provide to the company," said Mr. Peacock.

"After hearing from the key members of Aero management, we are even more convinced of

### Javelin Unveils Newsletter and Management Blog

With the issuance of this newsletter, Javelin Advisory Group has launched its quarterly update for those interested in following the progress of Javelin and its client companies. In addition to the newsletter, Javelin managing director Steven R. Peacock will initiate a Blog on the Javelin website, [www.javelinadvisory.com](http://www.javelinadvisory.com).

A mailing list to receive the newsletter has been established, so those who are interested in receiving an electronic version of the quarterly publication can subscribe on the Javelin website at [www.javelinadvisory.com/main.htm](http://www.javelinadvisory.com/main.htm).

the quality of Aero's technology and future of its product lines. We are pleased with the results of our meetings and are happy to advise our shareholders that Franchise Capital and Aero Exhaust are in agreement on all of the major details required to close the acquisition on a timely basis," Mr. Peacock stated.

"As a result of our meetings and the agreement on the details of the transaction, we expect to close the acquisition in less than three weeks – during the week of September 30th. Our focus from the beginning of our involvement with Franchise Capital was to deliver long-term value for our shareholders, and after confirming the final details of the acquisition, we believe that this transaction will do just that," added Mr. Peacock.

Franchise Capital Corporation was acquired by Mr. Peacock and Javelin Advisory Group as a non-reporting shell company in 2006. After reviewing several scenarios for the company, including a number of potential acquisition and reverse merger scenarios, Aero Exhaust was identified and signed as the future operating company for Franchise Capital.

In May 2007, Javelin Advisory Group brought Franchise Capital up to date on its financial filings, including the 2006 annual report and five delinquent quarterly periods, and the company achieved fully reporting status.

As part of the acquisition, Franchise Capital has provided \$1.9 million in financing in the form of a commercial loan to Aero. The value of the loan and any accrued interest are convertible into Aero Exhaust common stock at the time the share exchange closes.

## CLIENT UPDATE

# Javelin Advisory Client ActionView International Completes Binding Agreement to Serve as Public Vehicle for Dalian Chuming Reverse Merger

ActionView International, Inc. (OTC BB: AVWI), a client of Javelin Advisory Group, has entered into a binding agreement with Redwood Capital Inc., under which ActionView would become the public vehicle for the entrance of Dalian Chuming Group Co., LTD into the U.S. public markets.

Javelin Advisory Group was retained by ActionView to maintain its fully reporting status and assist with the implementation of a strategy to deliver value for ActionView shareholders. Javelin is currently participating in several acquisition and reverse merger processes and has provided insight to ActionView on the potential of such a transaction.

Dalian Chuming Group Co., LTD is a client of Redwood Capital, which assists private Chinese companies to achieve listings in the U.S. public markets through reverse merger transactions.

Redwood Capital has a binding agreement with Dalian Chuming Group, under which Redwood will provide certain services related to the reverse merger, including the sourcing of a public company suitable for Dalian Chuming Group. ActionView International, a fully reporting Over-the-Counter Bulletin Board listed company, has been selected to serve as the public vehicle for the Dalian Chuming Group reverse merger.

Dalian Chuming Group Co., LTD ([www.chuminggroup.com](http://www.chuminggroup.com)) is a major producer and exporter of fresh and frozen pork and other cooked meat products. The Chuming Group is among a select group of industrialized farming corporations in northeastern China and is known for its international quality management standards and international safety certifications.

In late 2006, the company officially opened a \$2.9 million feedmill with a capacity of 200,000 tons per year that will support its expansion of pork production. The pursuit of a U.S. public listing is expected to allow the Chuming Group to expand into additional worldwide markets.

The binding agreement between ActionView International and Redwood Capital outlines the terms of the transaction, which includes a stock position for current ActionView shareholders and a cash payment for the purchase of the public company.

"ActionView International's binding agreement with Redwood Capital, coupled with Redwood's contract with Dalian Chuming Group, further solidifies ActionView's position as the public vehicle for Dalian Chuming Group's entrance into the U.S. public markets," commented Rick Mari, director and CEO of ActionView.

"We are pleased to have reached this stage and look forward to the disclosure of Dalian Chuming Group's financials to the public markets, so our shareholders can see the considerable operating success and financial strength that Dalian Chuming Group will bring to the U.S. public markets," he added.

Redwood Capital is a wholly owned subsidiary of S3, a former client of Javelin Advisory Group. Javelin's managing director, Steven R. Peacock, visited a Dalian Chuming Group meat processing facility in Dalian, China last year. Dalian is major seaport on the South China Sea, south of the capital of Beijing. 

## A Word From The Managing Director

What is *The Javelin Index*?

As Javelin Advisory Group has expanded its services related to acquisitions and reverse merger transactions, there has been an increased interest in tracking the status of our current clients as well as new clients as they are signed and new deals as they are structured. *The Javelin Index* was conceived as a medium through which those who have expressed such an interest can follow the activities of our clients and the transactions with which we are associated.

We currently plan *The Javelin Index* to be a quarterly publication, but with several acquisitions and reverse merger transactions currently pending, we may publish it more frequently as events dictate.

In addition to *The Javelin Index*, we have created a blog on the Javelin website through which I will be able to communicate more regularly on the activities of Javelin and its clients. As a private company, we do not regularly issue press releases, so this will give the opportunity for a more timely reporting of our activities, especially related to the status of existing transactions as well as the sourcing of new clients.

This is an exciting time for Javelin Advisory Group and its network of associates, as we are involved with a number of high profile transactions and have a fairly steady flow of potential new clients. Much of this attention was first generated by the pending acquisition of Aero Exhaust, Inc. by Franchise Capital Corporation, a Javelin client for which I serve as CEO. This was planned as an interim management function, which is a role I will occasionally fulfill in the case of shells that do not have existing management to shepherd the company through the reverse merger process.

Beyond our existing client base, we are also being presented with additional potential clients through our network of associates. We expect that as current clients move forward and require fewer of our resources, we will begin our work on behalf of new clients.

This is one of the reasons for my upcoming trip to China, where I expect to be looking at several privately held operating companies that are seeking to listing in the U.S. markets. While we will be selective in the Chinese companies that we take on, experience has taught us that there are high quality brick-and-mortar companies with significant revenues and assets that will deliver long-term value for shell shareholders. These are the types of companies we will be targeting for current and future shells we represent.

I hope that readers of *The Javelin Index* will find it to be a useful publication and will continue to track the progress of Javelin Advisory Group and its clients.

Best regards,  
Steven R. Peacock, Managing Director

## Javelin Managing Director Plans China Trip to Explore Additional Merger and Acquisition Candidates

Javelin Advisory Group managing director Steven R. Peacock is planning a trip to China for site visits with potential reverse merger candidates based in the China market. Private Chinese companies are seen as attractive candidates for reverse merger transaction with U.S. public “shell” companies.

ActionView International, Inc. (OTC BB:AVWI), a client of Javelin Advisory Group, is currently involved in a reverse merger transaction with Dalian Chuming Group Co., LTD. ActionView has entered into a binding agreement with Redwood Capital Inc. under which ActionView International would become the public vehicle for the entrance of Dalian Chuming Group into the U.S. public markets (see article on page 2).

One purpose of Mr. Peacock’s trip to China will be to assist with any final work necessary on the China side for the completion of the ActionView/Dalian Chuming Group reverse merger.

Mr. Peacock is familiar with Dalian Chuming Group and visited the its facilities in Dalian last year. He also made the introduction of Dalian Chuming Group to ActionView International, which has resulted in the agreements between the two companies.

“I was tremendously impressed with Dalian Chuming Group and all of the facilities I visited during my trip to China last year,” stated Mr. Peacock.

“This includes the facilities outside of Dalian where the animals are raised and the processing and corporate office facilities in Dalian itself. All of these are first-rate facilities. After seeing these facilities firsthand, it is my view that if these facilities were located in the United States, they would still be considered models of cleanliness, efficiency and modernity,” he stated.

Dalian Chuming Group Co., LTD ([www.chuminggroup.com](http://www.chuminggroup.com)) is a major producer and exporter of fresh and frozen pork and other cooked meat products. The Chuming Group is among a select group of industrialized farming corporations in northeastern China and is known for its international quality management standards and international safety certifications. In late 2006, the company officially opened a \$2.9 million feedmill with a capacity of 200,000 tons per year that will support its expansion of pork production.

“Beyond what I was able to see of the facilities, I would echo the sentiments of ActionView director and chief executive officer Rick Mari when he stated that Dalian Chuming Group is a company with considerable existing financial success and the potential for tremendous additional growth through this U.S. public company listing,” Mr. Peacock added.

In addition to assisting with the close of the ActionView/Dalian Chuming Group reverse merger, Mr. Peacock will visit several private Chinese companies that may be potential reverse merger candidates for current and future Javelin clients.

“Javelin has some experience with Chinese companies, and we believe that there are opportunities to bring selected candidates into the U.S. markets and deliver real value for the public company shareholders. These transactions, known as reverse takeovers or RTOs in China, are also seen as attractive to solid Chinese companies seeking additional growth capital for expansion both within China and in international markets,” Mr. Peacock said.

Mr. Peacock’s travels will be chronicled in *The Javelin Index* and Mr. Peacock’s blog on the Javelin Advisory website, [www.javelinadvisory.com](http://www.javelinadvisory.com). 

## CLIENT UPDATE

### CLX Investment Company Closes In on Completing Definitive Agreement to Acquire Zonda, Incorporated

Javelin Advisory Group client, CLX Investment Company (OTC BB:CLXN), is closing in on a Definitive Agreement to acquire the remaining issued and outstanding shares of Zonda, Incorporated. CLX currently holds a 46% equity position, a developer and manufacturer of unique diagnostic tests for both the medical and non-medical markets.

Javelin’s managing director, Steven R. Peacock serves as consultant CEO for CLX and has targeted the acquisition of Zonda as part of a broader strategy to build value in CLX.

CLX was acquired by Javelin Advisory Group as a shell company, and functioned as a business development company (BDC) from September 2004 to May of 2007. As a BDC, CLX acquired an interest in Zonda, which has distributed its diagnostic medical testing devices in European markets over the past several years.

Zonda’s tests utilize proprietary technology that detects enzymes that are specific to the target microorganisms. The Zonda medical diagnostic tests are ideal for the clinical laboratory, point of care, and the over-the-counter (OTC) markets.

Zonda’s strong intellectual property position in enzymatic detection technology will give the company a unique position in the clinical diagnostic market where there is increasing need for simple, reliable, and cost-effective rapid point of care diagnostic tests. The company’s first medical test for Chlamydia is expected to launch in the U.S. at the end of the first quarter 2008. Zonda believes it will compete successfully with all current technologies, including the “gold standard” nucleic acid amplification testing (NAAT) technology, while offering several enhanced features.

CLX announced an initial agreement to acquire the remaining issued and outstanding shares of Zonda in August 2007. The parties are currently completing negotiations on the Definitive Agreement. 

## NEW CLIENT ALERT

### Javelin Signs to Bring HAZ Holdings Current with Financial Reporting to Show Revenues and Asset Value

Javelin Advisory Group client has signed with HAZ Holdings, Inc. (OTC: HAZH), which manages a portfolio of full-service hotels, to initiate efforts to bring HAZ current with its financial filings and to achieve fully reporting status. HAZ has targeted fully reporting status showing its revenues and asset value so it can be properly positioned in the public markets.

HAZ Holdings recently stated its intention to begin the process of filing all past financial statements so the Company can be properly positioned in the public markets.

“We are pleased to have retained Javelin Advisory Group as part of our efforts to complete all of the Company’s financial statements and achieve fully reporting status,” stated HAZ Holdings CEO Dr. Karim Bhanji.

## **GTREX Capital Announces Unwind of Agreement to Acquire Elleipsis, Inc.**

### **Javelin Helping to Identify New Acquisition Target with Greater Upside Potential**

**G**TREX Capital, Inc. (OTC BB: GRXI), a holding company with subsidiary operations in the travel distribution industry, today announced that the company will not be proceeding with its preliminary agreement to acquire all of the issued and outstanding shares of Elleipsis, Inc. and will pursue other acquisition opportunities for the company.

Under terms of a services agreement unrelated to the preliminary acquisition agreement, GTREX Capital contracted with Elleipsis to migrate the Voyager Network technology platform of its Global Travel Exchange subsidiary to the Elleipsis technology. The agreement also includes any necessary technical maintenance and support, software updates, hosting, and development.

"It was determined that we had already secured the services we needed for Global Travel Exchange through our migration agreement with Elleipsis, as well as through a previous purchase of software and services that GTREX Capital made in 2005," stated Steven R. Peacock, GTREX Capital consultant chief executive officer.

"As we were completing the due diligence and negotiation process with Elleipsis, several new acquisition and reverse merger opportunities were presented to GTREX Capital, and it became apparent that we should consider these as possibilities," Mr. Peacock said.

GTREX Capital is also exploring a number of business opportunities related to the travel industry that could considerably expand the operations of its Global Travel Exchange subsidiary.

"Whatever the final acquisition target, we are committed to moving forward with a transaction that will bring long-term value to shareholders, and we do expect to have another company identified in the near term," added Mr. Peacock.

In a subsequent September 25, 2007 announcement, GTREX Capital further defined the acquisition target it is considering for an acquisition or reverse merger. The company stated that the acquisition targets are in a variety of market segments including hospitality, manufacturing and recreation.

GTREX Capital reiterated its intention to identify and acquire a company with sustainable revenues and the potential for significant long-term growth in its respective industry segment.

Global Travel Exchange is a travel distribution technology company that provides a more efficient and cost-effective connection between customers and travel suppliers.

Since several of the acquisition candidates are not in the travel industry, there may be a spin-out of Global Travel Exchange that would include a dividend of its shares to GTREX Capital shareholders as part of the acquisition transaction.

"We are currently conducting extensive due diligence on the acquisition candidates, and we believe that once we determine which of these acquisition targets will ultimately become the focus

## **Javelin Begins Work to Bring HAZ Holdings Current with Financial Reporting by Retaining Independent Auditor**

(continued from page 3)

"While the growth of our hotel ownership portfolio will continue to be the primary focus of the Company's operations, bringing our quarterly and year-end financial reports up to date will be another ongoing initiative to improve the Company's position in the public markets.

"Fully reporting status will allow HAZ Holdings to begin evaluating the efficacy of a listing in an appropriate market and continued growth of our hotel ownership portfolio will play an important role in determining which market will be most appropriate for the Company," added Dr. Bhanji.

Upon signing with HAZ, Steven R. Peacock, managing director of Javelin Advisory Group, commented, "We see tremendous potential for HAZ Holdings in the public markets, and we look forward to the opportunity to work with Dr. Bhanji to bring the Company current with its financial reporting. Fully reporting status is an important first step for HAZ Holdings as it works to build long-term value for its shareholders, and we hope that this initial agreement will lead to a long and successful association between our two companies."

The revenues and asset value of HAZ Holdings is expected to allow it to be well-positioned in the public markets, and HAZ management will work with Javelin Advisory Group to pursue a listing in an appropriate market based on an accurate evaluation once the financial reporting has been brought current.

Several weeks after announcing the engagement of Javelin to head its efforts to become fully reporting, HAZ Holdings announced the selection of Gruber & Company, LLC to complete the company's past financial statements, including annual reports for the 2005 and 2006 fiscal years, as well as all three quarterly reports for 2007.

Javelin Advisory Group will work with Gruber & Company to complete and file the past financial statements and maintain fully reporting status once it is achieved.

"By engaging Gruber & Company to work with Javelin Advisory Group to complete all of our past financial reports, we have initiated the process of achieving fully reporting status," commented Dr. Bhanji.

"Once we are fully reporting, we can evaluate the company's options related to a potential listing in an appropriate market. The continued growth of our hotel ownership portfolio will be a critical aspect of these efforts, as it will allow HAZ Holdings to be properly valued as a public company based on its current and future revenues and assets," Dr. Bhanji added. 

of the company's operations, the transaction will attract significant interest in the public markets," stated Mr. Peacock.

"GTREX Capital will conduct its due diligence efforts while it continues to support the growth of Global Travel Exchange and pursues the opportunities that are currently being presented to this subsidiary," he added.
